

Francis Marlou Pacaro

IT Infrastructure Senior Associate

IT infrastructure professional with more than five years of hands-on experience supporting networks, servers, and end-user systems for clients such as L'Oréal, British Council, Globe Telecom, and Dell. Comfortable with Cisco firewalls, Linux, Active Directory, and virtualization, and in the habit of tracing problems to their root cause. Computer Engineering graduate and Linux kernel contributor.

WORK EXPERIENCE

IT Infrastructure Senior Associate

Prople BPO Inc.

05/2022 – Present

Mandaluyong City, NCR

Achievements

- Reduced SSH brute-force attempts on company Linux servers by 39.9% after reviewing 37 days of login and firewall logs and blocking the most active source networks at the firewall, with no systems compromised.
- Supported the IT manager on a core switch replacement, network segmentation, and firewall migration, and wrote the maintenance notices and rollback plans for both changes.
- Designed and deployed the first phase of an HAProxy reverse proxy that lets several services share public IP addresses across two internet providers.
- Closed 497 of 500 tickets between May and September 2026, from building virtual servers and administering Linux systems to user onboarding and support for client accounts such as L'Oréal.
- Automated Windows deployment with WDS and MDT, replaced shared local administrator passwords with LAPS across the domain, and rolled out Acronis EDR to company endpoints.

Local IT Support

British Council (via Prople BPO IT Managed Services)

05/2022 – 05/2023

Bonifacio Global City, NCR

Achievements

- Migrated the office's shared drives to SharePoint and upgraded its network with new routers and servers.
- Sped up laptop setup by deploying machines over the local network with WDS.
- Supported staff on-site, from printer and software installations to issuing secure access cards.

Technical Support Engineer

Unison Computer Systems, Inc. (Client: Globe Telecom)

02/2021 – 02/2022

Pasig City, NCR

Achievements

- Installed endpoint security tools such as McAfee, CrowdStrike, and Ivanti so laptops met the client's security standards.
- Prepared HP and MSI laptops with standard business software and joined them to the Globe domain.
- Diagnosed and repaired laptops on-site, working with vendors on warranty part replacements.

Field Support Engineer

ActionLabs IT Services Phils. Corp. (Client: Dell)

10/2020 – 12/2020

Quezon City, NCR

Achievements

- Repaired Dell desktops, laptops, and peripherals on-site, replacing motherboards, SSDs, and memory as needed.
- Managed service tickets and wrote detailed diagnostic and repair reports.

IT Intern (On-the-Job Training)

Dr. Jose Rizal Memorial Hospital (DOH)

2018

Dapitan City, Zamboanga del Norte

Achievements

- Restored X-ray image transfers to the outpatient department by finding and fixing a missing network address.
- Resolved IP conflicts, replaced faulty lab cabling, and helped re-address all three hospital buildings.
- Inventoried the hospital's computers and IP assignments and mapped each building's network.

SKILLS

Network Administration

Cisco Firepower (FTD/FMC)

VLAN & Network Segmentation

HAProxy Reverse Proxy

Linux Server Admin (CentOS)

VM Provisioning

Active Directory & GPO

WDS / MDT / LAPS

Endpoint Security & EDR

UniFi Wireless

Google Workspace & M365

Bash & Fish Scripting

C (Linux Kernel)

Root-Cause Analysis

Change Management

Business Continuity

SLA Reporting

Communication

Attention to Detail

Technical Writing

EDUCATION

Bachelor of Science in Computer Engineering

Jose Rizal Memorial State University – College of Engineering

Graduated 2019

Dapitan City, Zamboanga del Norte

- Capstone project: Water Meter Monitoring System

CERTIFICATIONS

National Certificate II (NC II) in Computer Systems Servicing

TESDA · 2017

OPEN SOURCE CONTRIBUTIONS

Linux Kernel – AMD Graphics Driver Fix

Upstream Linux (amdgpu), merged in 7.3-rc4

09/2026

github.com/torvalds/linux · commit 2ac2fe765ef4

- Found a driver bug on an RX 6600 that switched off a GPU power-saving feature on displays running above about 243 Hz, and traced it to an integer underflow in the display code.
- Wrote the C patch to fix it; it was reviewed by AMD and merged into mainline Linux.

TRAININGS & SEMINARS

pfSense Tech Talk

ICpEP Region IX Regional Convention · 2018

Engineering Invention Contest & Expo

ZPCDEED Council Convention (Participant) · 2017

File System Management Seminar

JIECEP – JRMSU Chapter · 2017

Web Development with Joomla

JRMSU Computer Engineering Organization · 2016

Data Business Analytics Tech Talk

ICpEP Region IX Regional Convention · 2018

4th PCB Making Workshop

JRMSU Computer Engineering Organization · 2017

Web Development with WordPress

JRMSU Computer Engineering Organization · 2016

Basic Automation & Robotics Seminar

JRMSU Computer Engineering Organization · 2016
